

NAHUEL BRIZUELA

IT Solutions Engineer · Infrastructure & Support · Automation & AI

Ituzaingó, Buenos Aires, Argentina · +54 11 2829 2236 · nahuelgbrizuela@gmail.com
[linkedin.com/in/nahuel-brizuela](https://www.linkedin.com/in/nahuel-brizuela) · [Portfolio](#) · Available Immediately

PROFESSIONAL SUMMARY

IT Solutions Engineer with hands-on experience across technical support, on-site infrastructure administration, and cloud environment management. Strong command of the Microsoft ecosystem (Microsoft 365, Azure, Entra ID, Intune) and corporate networking (routers, switches, access points, racks), with incident management under SLA using Jira Service Management and Active Directory. Differentiated by process automation and AI integration (n8n, LLMs via API) to improve operational efficiency. Proactive profile, available immediately, with own transportation and a strong drive to learn new technologies.

TECHNICAL SKILLS

Microsoft Ecosystem & Cloud: Microsoft 365, Microsoft Entra ID (Azure AD), Intune (MDM), Exchange Online, Azure, Active Directory, AWS (EC2, S3).

IT Support & Operations: Multi-tier support (Tier 1-3), Help Desk, Jira Service Management, SLA-based incident management, hardware/software troubleshooting, technical documentation / knowledge base (KB), POS systems.

Networking & Infrastructure: Routers, switches, access points (AP), VLAN, DHCP, VPN, rack auditing and assembly, Ubiquiti (UniFi), load balancing, CCTV.

Automation & Development: Node.js, TypeScript, JavaScript, Python, Docker, Git, CLI, PostgreSQL, MySQL, Agile methodologies (Scrum).

Artificial Intelligence & Workflows: n8n, LLM integration (OpenAI, Anthropic) via API, agent development, prompt engineering, process automation.

Operating Systems: Windows, Linux / Ubuntu.

PROFESSIONAL EXPERIENCE

AI Automation & Integration Specialist

2024 - Present

Freelance / Personal Projects

- Integrated AI models (LLMs) via API (OpenAI, Anthropic) into applications and internal workflows.
- Designed automations and agents with n8n, orchestrating workflows across APIs, databases, and corporate tools to reduce manual tasks.
- Made extensive use of the CLI to streamline processes and build, review, and deploy projects; integrations with Node.js and TypeScript.

Information Technology Specialist

Jun 2024 - Feb 2026

EC Sistemas SRL — Clients: ClarkeModet / Western Union · Remote / On-site

- Provided multi-tier technical support (Tier 1-3) for hardware, corporate software, and connectivity issues under SLA agreements.
- Managed identities, security policies, and device provisioning (MDM) with Active Directory, Microsoft Entra ID (Azure AD), and Intune.
- Handled incident management and built knowledge base (KB) articles in Jira Service Management; on-site field support at Western Union: rack auditing/assembly, PCs, printers, and network interfaces.
- Automated ticket workflows with Node.js / TypeScript scripts, reducing operational response times.

Full Stack Developer & Automation Engineer

Jan 2021 - Dec 2023

Emi Sens · Freelance

- Developed microservices and automation tools using Node.js, TypeScript, Java, and Python.
- Managed cloud infrastructure on AWS (EC2, S3), deployed Docker containers, and administered PostgreSQL and MySQL databases.
- Troubleshoot and resolved production errors through log analysis.

EDUCATION

Electronics Technician program (incomplete) — UTN, National Technological University

High School Diploma — Social Sciences track (Public Policy Management)

- Self-taught in IT infrastructure, corporate networking, the Microsoft ecosystem (Azure, Entra ID, Intune, M365), and AI-driven automation.

LANGUAGES & AVAILABILITY

Languages: Spanish (native). English: intermediate (B1), continuously improving.

Mobility: Class B1 driver's license and own vehicle. Available to travel and relocate.

Work mode: Remote / Hybrid / On-site. Available immediately.
